PUBLIC HEALTH AND MEDICAL (EMERGENCY FUNCTION 08) SITUATION REPORT

EBOLA VIRUS DISEASE, 2014

DATE OF REPORT: NOVEMBER 21, 2014
OPERATIONAL PERIOD: NOVEMBER 17 – NOVEMBER 21, 2014
CALIFORNIA DEPARTMENT OF PUBLIC HEALTH
EMERGENCY MEDICAL SERVICES AUTHORITY

EXECUTIVE SUMMARY

NOTE: For quicker review of this document, red text will be used for all NEW information added from the previous day within the operational period.

There are currently no suspected or confirmed cases of Ebola Virus Disease (EVD) in California. At present, the situational assessment for the risk of EVD infection in California remains very low.

The outbreak of EVD in the West African countries of Guinea and Liberia is no longer increasing nationally, but in Sierra Leone EVD continues to expand. On November 16, 2014, the World Health Organization (WHO) added Mali to the countries with confirmed cases with related deaths. However, EVD still does not pose a significant risk to the United States. As of the Situation Report dated November 16, 2014, the WHO has reported a cumulative total of 15145 cases of EVD and 5420 deaths.

The Centers for Disease Control and Prevention (CDC), California Department of Public Health (CDPH), California Office of Emergency Services (Cal OES), State level Emergency Function 08 partners, and Emergency Medical Services Authority (EMSA) continue to prepare for the management of potential EVD cases in California.

In order to protect or preserve the public health, on October 29, 2014, the State Public Health Officer of the State of California issued an order requiring quarantine for individuals at risk of contracting and spreading Ebola. The order establishes a statewide protocol to assess the risk posed by these travelers arriving in California. This order is located on the CDPH website at

http://www.cdph.ca.gov/Documents/Order %20Ebola10292014.pdf.

CDPH continues to work with the healthcare community and local health jurisdictions to identify potential suspect cases and avoid spread of the disease. New guidelines and updated guidelines released by CDC and CDPH are posted on the CDPH website available at: (http://cdph.ca.gov/programs/cder/Pages/Ebola.aspx).

EMSA previously developed interim guidelines for Emergency Medical Services (EMS) personnel based on the recommendations of CDC and the California Department of Industrial Relations (DIR). The guidelines have been distributed to Local Emergency Medical Services Agency (LEMSA) Administrators, LEMSA Medical Directors and the Regional Disaster Medical Health Coordination (RDMHC) Program. The document is posted on EMSA's website at http://www.emsa.ca.gov/ebola_control. Subsequently, EMSA has convened and is coordinating a workgroup of professionals and subject matter experts representatives from the Emergency Medical Directors Association of California (EMDAC) and representatives from the Emergency Medical Services Administrators Association of California (EMSAAC) to develop best practices utilizing information the Centers for Disease Control and Prevention, the California Department of Public Health, the Department of Industrial Relations (DIR) and Cal-OSHA, along with local policies and procedures developed by local emergency medical services agencies. EMSA, EMDAC, and EMSAAC continue to work with our partners on:

- Recommended personal protective equipment (with DIR/Cal-OSHA)
- Patient Destination (with CDPH and LEMSAs)
- Decontamination

CDPH continues to recommend that healthcare providers implement the protocols established by the CDC about how to detect and isolate patients who may have EVD and about how healthcare workers exposed to EVD can be protected.

DUTY OFFICERS ON CALL

Table 1. Duty Officers On Call			
Agency/Program	Duty Officer Informa	tion	
CDPH Duty Officer	Name:	Anthony Champion	
	Contact Information:	916-328-3605	
EPO Duty Officer	Name:	Jean Paradis	
	Contact Information:	916-328-9025	
EMSA Duty Officer	Name:	Michael Frenn	
	Contact Information:	916-423-0911	

CDPH/DHCS/EMSA CURRENT OPERATIONS

The CDPH internal workgroup to address all public health aspects of the EVD response meets daily.

CENTER FOR INFECTIOUS DISEASES (CID) DIVISION OF COMMUNICABLE DISEASE CONTROL (DCDC)

RCCC/CID Ebola Activities

- Epidemiology and Surveillance Activities
 - Significant Issues:
 - CalREDIE Update:
 - Configured Travel History form and released for initial testing
 - Migrated the "Ebola Contact Tracking" & Symptom Diary to Production 10/31
 - Requested the names of State and local individuals who are involved in the Ebola response and need CalREDIE accounts, processing account requests as they come in (200+ as of 11/21).
 - Mocked up the Ebola Case Report.
 - Following up on the non-CalREDIE LHJs.
 - The Epi/Surveillance team continues to refine guidance for:
 - Contact Tracing/Management Plan.
 - Deployment Team Plan.
 - Case Investigation/Management Plan.
 - CDPH continues to be notified through EpiX of travelers returning to California from Ebola-affected countries. CDPH notifies the local health department/jurisdiction where the traveler returns to ensure local health department implementation of a screening and monitoring plan. Increasing staffing pool in anticipation of continuing this mission for several months.

The following information represents activities from the onset of the Ebola response through November 21, 2014

Table 2. Ebola Response					
Case Classification	Number of cases	Number tested for Ebola	Results		
			Positive	Negative	Pending
Confirmed case	0				
Case under investigation with high-risk exposure	0				

Persons with low-risk exposure with specimens collected	3	3	3	

- Critical Issues: None
- Program Impacts:
 - Significant program impact on day-to-day activities of DCDC clinical consultants and staff that participate in RCCC activities. DCDC branches are deferring non-essential functions to handle Ebola workload.

Laboratory Activities

- Significant Issues:
 - Received and responded to inquiries regarding specimen testing from local hospitals and public health departments.
 - Purchased PPE in preparation for Ebola specimen testing at the VRDL. Purchases should all be received within the next two weeks.
 - Conducting TSS on-site visit/inspection on 11/21. Results of their inspection will be available in 7 – 9 days.
 - Conducing staff training on PPE use, safety, and occupational health issues in preparation for on-site Ebola specimen testing.
- Critical Issues:
 - None.
- Program Impacts:
 - Significant impact on day-to-day activities of staff involved in preparedness and procurement activities.

Infection Control Activities

- Critical Issues:
 - There are many reports of healthcare facilities encountering shortages and/or difficulty obtaining recommended PPE.
 - There is a strong need for development and/or dissemination of training materials on proper use of PPE.
 - CDPH will be facilitating and participating in CDC-led onsite infection control assessments of the 5 UC Medical Centers designated to care for Ebola patients. Guidance from CDC on the composition of the assessment team is awaited.

- Program Impacts:
 - Significant impact on day-to-day activities of staff across programs and agencies, resulting in setting aside non-essential functions to handle Ebola workload.

Information Officer Activities

 RCCC is continuing to respond to Local Health Departments and other inquiries on Ebola.

RICHMOND CAMPUS COORDINATION CENTER (RCCC) ACTIVITIES

- Significant Issues and Activities:
 - o Released two new guidance documents (listed below)
 - Received and responded to inquiries redirected from the CDPH Hot Line
 - Conducting frequent meetings with LHDs, EMSA, DIR and others regarding Ebola response elements.
 - Critical Issues: None

CDPH DOCUMENTS/MATERIALS RELEASED THIS OPERATIONAL PERIOD

- Planning for and Management of Travelers from Ebola-Affected Countries and U.S. Ebola Case Contacts for Local Health Departments
- Ebola Preparedness and Response for Outpatient and Ambulatory Care Settings

ENVIRONMENTAL MANAGEMENT BRANCH (EMB)

The EMB Medical Waste Management Program has updated the "Ebola Virus Disease Medical Waste Management – Interim Guidelines" and are now posted at the program's website: http://www.cdph.ca.gov/certlic/medicalwaste/Pages/default.aspx

EMERGENCY PREPAREDNESS OFFICE (EPO)

 CDPH and EMSA continue activation of the MHCC to support activities of the RCCC and departmental programs, and enhance communication between emergency response and preparedness partners in California.

- MHCC and EPO management regularly participate in teleconferences regarding EVD with Federal, State, and local partners, assist in development of guidance documents, and coordinate CDPH program actions.
- MHCC maintains an incident on the Cal EOC website.
- CDPH has contracts in place with World Courier to accommodate transport of EVD samples.
- The call center (1-855-421-5921) remains active as a point of contact for public inquiries.

DIVISION OF LICENSING AND CERTIFICATION (L&C)

 L&C continues to hold a weekly teleconference with Health Care Facilities/Providers. At this time, the teleconference is held on Wednesday from 11:00 a.m. – 12:00 p.m.

CAHAN ALERTS

November 17 to November 21:

- 11-17-14 CDPH Guidance Ebola Guidelines for Outpatient and Ambulatory Care
- 11-17-14 CDPH Guidance Planning for and Management of Travelers from Ebola-Affected Countries
- 11-18-14 CDPH Weekly Local Health Department Ebola Update Conference Call for November 19, 2014
- 11-19-14 CDPH Weekly Healthcare Provider and Facility Ebola Update Conference Call, Wednesday, November 19, 2014

EMSA

EMSA is working with the Local Emergency Medical Services Administrators'
Association of California (EMSAAC) and the Emergency Medical Directors'
Association of California (EMDAC) in developing Guidance for the EMS
Management of Infectious Disease such as Ebola. Local EMS Agencies
(LEMSAs) are working with their ambulance providers and have identified
ambulance companies that will transport these high risk patients. Contra Costa
EMS Agency has developed a conceptual model for an Infectious Disease
Ambulance Response Team (IDART) and other LEMSAs are developing similar

- models. AMR has already transported Ebola patients in Texas and is also developing special transport teams and is among the providers outfitting specialized ambulances.
- EMSA has issued guidelines for EMS personnel based upon CDC recommendations through the RDMHC and Medical and Health Coordination (MHOAC) Programs. EMSA is prepared to continue coordination with EPO, RDMHC, and MHOAC Programs.
